Due to a limited commercial release of GM Canola (CS01) and as NSW and Victoria are states comingling Non GM (CS01-A) and GM (CS01) Canola varieties, GrainCorp Oilseeds seeks a declaration as to the status of all Canola produced by you in the current growing season. The Term CS01-A refers to Canola with approved genetically modified organism adventitious presence less than 0.9%. Identity Preserved (IP) requires that CS01-A be kept separate from other varieties, right from the seed planting stage through to end use.

I/We agree that the Canola delivered against this receival document is IP/CS01-A (Identity preserved Non GM Canola), and that the following criteria were satisfied:

1. CS01-A seeds were the only seeds planted in the field.
2. All other seeds were removed before the seed was put in the planter.
3. Harvesting equipment, transport vehicles and storage equipment were cleaned and inspected. They were found to be FREE FROM ALL of the following: foreign objects, any non CS01-A products, objectionable odours, transferable stains, hazardous material.

By signing this seed declaration/ticket you warrant that all information contained within is true and correct and that the Canola (IP/CS01-A) supplied to GrainCorp Oilseeds conforms to all respects with the contract the subject of the declaration. I/We further agree that the cash price per mt (if applicable) indicated on this receival document is correct, is fixed and final and that my/our representative's signature on this document constitutes an irrevocable acceptance of the price offered.

GrainCorp Oilseeds does NOT allow overloading and may refuse to unload a vehicle deemed to be unsafe due to its weight or otherwise GrainCorp Oilseeds may be required by law to provide this document and other information in relation to this specific load to the transport authorities. Heavy fines and other penalties may apply in relation to a breach of this legislation.
