

GrainCorp

2008/09

**Schedule 1:
Country Price Schedule for the Receival,
Storage and Outloading of Winter Grains**

Winter Grains for the purposes of this schedule are Wheat, Barley, Oats, Triticale, Field Peas, Faba Beans, Chick Peas and Canola

Separate Schedules are available for (1) Port Services, (2) Transshipment and Importations and (3) Summer Grains.

To be read in conjunction with the 2008/09 GrainCorp Storage and Handling Agreement.

GrainCorp

comgrpcountry20080930

Storage & Handling Country Pricing Schedule 2008/09

Page 1 of 14

Schedule 1

GrainCorp Country Storage & Handling Fees for Winter Grains 2008/09

Notes:

1. Unless stated otherwise, all prices are quoted as AUD per tonne.
2. Fees for summer grains (eg Sorghum) are available on separate schedule.
3. All fees are quoted exclusive of GST.
4. These prices are effective for 2008/2009 season grain and remaining old season grain held in store after 30 September 2008.

1.0 GrainCorp Country Fees Summary Table

(Further details and additional miscellaneous fee types are to be found in the main body of document).

Note: From 1 March – 30 June 2009 inclusive, Growers will be charged an additional \$2.00 per tonne to the receival fees listed below in the summary table. From 1 July 2009, Growers will be charged an additional \$5.00 per tonne to the receival fees listed below in the summary table. The additional fees are necessary for biosecurity, grain quality and grain hygiene purposes.

Fee Type	Commodity	Component	Fee / T	Occurrence
Receival	Wheat	Standard Grade	\$5.90	On Receival
		Durum Grades	\$7.45	
		Special Grade	\$8.50	
		Wheat Quality Surveillance Fee	\$0.15	
	Barley	Feed Grades	\$7.20	
		Malt Grades	\$7.70	
		Special Grade	\$9.90	
	Triticale	Standard Grade	\$8.65	
	Legumes	Standard Grade	\$9.75	
	Oilseeds	Standard Grade	\$8.65	
Special Grade		\$10.32		
Oats	Standard Grade	\$10.32		
Monthly storage fee 07/08 and prior season grain carried into 08/09 season	All Winter Grains (excluding canola)	October 1 2008 and monthly until notified otherwise	\$2.16	Monthly
	Canola		\$2.38	
Monthly storage* fee 08/09 season grain	All Winter Grains (excluding canola)	First of month after receival until opening of 2009/10 season	\$1.35	Monthly
	Canola		\$1.46	
Monthly storage* fee 08/09 season and prior season grain carried into 2009/10 season	All Winter Grains (excluding canola)	As of opening 2009/10 season then ongoing	\$2.25	Monthly
	Canola		\$2.48	
Outloading	All Winter Grains	Within normal operating hours ^	\$5.42	On Outturn
		Outside normal operating hours	\$7.03	
Title Transfer	All Winter Grains (seller's fee)	Internet	\$0.17	On Transfer
		Manual (Paper)	\$0.32	

* Emerald & Toowoomba regions commence 2009/10 season on September 1, 2009; all other regions on October 1, 2009.

^ Explanation of operating hours for both road and rail is contained in the main body of schedule.

2.0 Receival Fees

Detailed Fee Description and Explanations

Country Ex Grower Receival Fee	Commodity	Component	Fee / T
All country silos and Corio site at Geelong	Wheat	Standard Grade	\$5.90
		Durum Grades	\$7.45
		Special Grade	\$8.50
		Wheat Quality Surveillance Fee	\$0.15
	Barley	Feed Grade	\$7.20
		Malt Grades	\$7.70
		Special Grade	\$9.90
	Triticale	Standard Grade	\$8.65
	Legumes	Standard Grade	\$9.75
	Oilseeds	Standard Grade	\$8.65
		Special Grade	\$10.32
	Oats	Standard Grade	\$10.32

Note: From 1 March – 30 June 2009 inclusive, Growers will be charged an additional \$2.00 per tonne to the receival fees listed below in the summary table. From 1 July 2009, Growers will be charged an additional \$5.00 per tonne to the receival fees listed below in the summary table.

The additional fees are necessary for biosecurity, grain quality and grain hygiene purposes.

The receival fees apply to all tonnes delivered into GrainCorp's country sites from either ex-grower or from sources external to GrainCorp. The receival fee is calculated on the receival tonnage as recorded on the receival dockets, prior to the deduction for shrinkage.

2.1 Services included in the receival fee

The services included in the receival fee are as follows:

- Receival into Country Sites ex-grower or from sources external to GrainCorp during the hours and days specified by GrainCorp;
- Sampling and classification on delivery;
- Testing services;
- Weighing on delivery;
- Recording and provision of delivery information on Receival Dockets;
- Grain segregation as per harvest plan;
- Insurance for all general physical risk (ie. fire, flood, storm etc.).

2.2 Standard and Special Grades

For the purposes of charging for segregations, grades have been classified into standard and special grades. Standard Grades are all grades identified to be received by GrainCorp in the pre-harvest segregation plan. *Special Grades* refer to noodle and soft wheat segregations and other specific grades requested before or during the harvest period that are agreed between the customer and GrainCorp prior to implementation.

2.3 Durum Grades

All durum receivals will be assessed using the Cervitec digital analyser for determining vitreous kernel. The pricing differential has been necessitated by the cost of the digital imaging equipment.

2.4 Wheat Quality Surveillance Fee

The Wheat Quality Surveillance Fee includes provision of comprehensive and up to date harvest quality information based on running sample data information analysed in GrainCorp NATA certified labs. It also covers provision of test milling and animal nutrition data at early harvest and harvest completion on a port zone basis.

The Wheat Quality Surveillance Fee also funds research and development programs including provision of samples to researchers, and Grower Declaration auditing including pesticide residue status and varietal declarations.

Sample notification requirements obtained prior to harvest and collected during intake are included in the fee. NB: Additional sample requests in excess of 5kg/Site will be charged at \$50/kg.

Harvest data and samples will be provided on a site/grade and/or port zone basis where customers own stock. The port zone codes, site lists and forms for registering for samples and data are available by contacting Karen Magann on 07 4639 9297 or kmagann@graincorp.com.au.

2.4.1 Sample Collection

GrainCorp will collect and compile on a best endeavours basis, the following composite samples for analysis.

1. Site by Grade composite samples (SGCS) – all GrainCorp sites receiving wheat
2. Port zone by Grade composite samples (ZPCS, ZFCS).

Preliminary port zone composite samples (ZPCS) are to represent approximately 20% of expected harvest receivals. Final port zone composite samples (ZFCS) are to represent at least 80% of expected harvest receivals.

Note that FED port zone grades have not been designated for milling testing, only for nutritional analysis. If received in sufficient quantity, testing and provision of milling results may be available to marketers.

Specific milling and baking on other quality testing can be provided on a fee for service basis.

2.4.2 Sample Analysis - Tests Conducted

The following tests will be conducted on samples delivered from receival sites for analysis.

1. Site by Grade composite samples
Moisture, protein, screenings, test weight, unmillable material, falling number, grain defects, grain contaminants.
2. Port Zone by Grade composite samples

Wheat grain – test weight, thousand kernel weight, grain hardness, protein, moisture, wheat ash, falling number, screenings, US dockage, foreign material, flour extraction

Wheat flour – protein, wet gluten, colour grade, diastatic activity, ash, sedimentation volume, Minolta Colour I value a value b value, farinogram, extensogram, alveograph (P,L,W, configuration ratio), viscogram (peak viscosity, gelatinisation temperature, time and breakdown)

Animal nutrition – dry matter, crude protein, digestibility, energy and acid detergent fibre.

End product – Straight dough baking test, sponge and dough baking test, yellow alkaline noodle test.

2.4.3 Nominated Testing Laboratory For Milling and Baking Testing

Agrifood Technology, 260 Princes Highway, Werribee, 3030. Victoria.

Site by Grade Analysis data will be collated from running samples by GrainCorp NATA 17025 accredited laboratories.

2.4.4 Supply of Analysis Data

1. Site by grade composite sample results
GrainCorp will supply results of site by grade samples representative of all receivals to date on a twice weekly (Tuesday and Friday) basis until 90% of the expected tonnage is received.
2. Port zone by grade composite samples
GrainCorp will supply preliminary port zone by grade composite sample results as described in this document will be made available progressively as available. These results will be posted on GrainCorp's website on or before this date.

Final port zone by grade composite sample results as described in this document will be supplied progressively as available. Final reporting is expected by March 31, 2009

2.4.5 Supply of Additional Samples

Samples will only be provided where customers have ownership on a site/grade grade/port zone. Companies requiring additional samples during the harvest period will need to supply a list of their needs to GrainCorp's Technical Services Division by Oct 15 by contacting Karen Magann on 07 4639 9297 or kmagann@graincorp.com.au for the required format. These may be supplied and dispatched free of any additional charges (excluding courier costs), providing they have already been compiled and those samples are available for distribution. Sample requests in excess of 5kg site/grade or 20kg grade/port zone will be charged at \$50/kg.

Samples which have not been compiled during the harvest period, or have been requested less than 4 weeks before the harvest commences may incur a separate and substantial charge based on POA.

1. Sample Labelling
Unless advised to the contrary, additional samples will be labelled with the following details

Sample type, port zone, site (if applicable) variety (if applicable) grade, season, date collected.
2. Sample Dispatch and Courier Costs
GrainCorp will dispatch additional samples using the courier nominated by individual marketers at their own cost at off peak rates. Thus, an account number and con-notes will be required. Alternatively, marketers can arrange for their preferred courier to collect from GrainCorp by completing their own con-note details.

2.5 Germination Management System for Malt Barley

Malt Grades fee includes the "Germination Management System" (GMS) service.

GMS is a method of managing malt barley germinations through:

- (a) Storage and Handling improvements to aid extension of life where possible.
- (b) Predictive modeling and advice to customers on expected shelf-life timeframes in order to aid logistics and sales.
- (c) Increased use of silos and sheds for storage and the adoption of fan aeration on stock where possible. The aim will be to balance bunker use for malt barley with storage plans that maximise pesticide residue free barley and management of insect resistance. Where bunkers are used, a system of priority out-turns will be in operation in consultation with all co-owners.
- (d) The GMS also provides a focus for Operations staff training related to post-harvest management and awareness of germinations.
- (e) The Germination Management System Quality Committee is responsible for: (a) identifying priority outturn sites and advising all malt clients of recommended outturn timeframes and (b) addressing operations equipment needs such as temperature monitoring, aeration fan use etc and (c) identifying storage research needs and allocating budgeting.
- (f) The provision of a "Yellow Flag" report to the Customer based on 'Predictive Modeling' that identifies outturn priorities. GrainCorp will endeavour to provide this information to customers to give anticipated notice in advance. As part of this service GrainCorp will:
 - 1. Give at least one month's notice of site grade stock that may be considered to be at risk of failing to outturn at minimum 95% germination.
 - 2. Draw post-harvest samples of malting barley stocks and provide germination reports to the customer on a regular basis from February – October.

3.0 Country Storage Fees

Description	Applicable Regions	Effective Dates	All non-canola grains	Canola
			Monthly F / T	Monthly Fee /T
Monthly storage fee 07/08 and prior season grain carried into 2008/09 season	All regions	October 1, 2008 and monthly until notified otherwise	\$2.16	\$2.38
Monthly storage fee for 08/09 season grain	Toowoomba & Emerald only	Commences 1 st day of 1 st month after receipt until (and including) August 2009	\$1.35	\$1.46
	All other regions [^]	Commences 1 st day of 1 st month after receipt until (and including) September 2009		
Monthly storage* fee 08/09 season and prior season grain carried into 2009/10 season	Toowoomba & Emerald only	September 1, 2009 and monthly until notified otherwise	\$2.25	\$2.48
	All other regions [^]	October 1, 2009 and monthly until notified otherwise		

* Storage fees apply on all accounting stock tonnes on the first day of the month at all sites. The charge will be applied to the opening balance held on the first day of each month.

[^] GrainCorp's Moree, Narrabri, Dubbo, Parkes, Wyalong, Wagga, Marong, Swan Hill and Horsham Regions. Moree Region includes some sites in the state of Queensland.

Storage fees apply on all accounting stock tonnes commencing on the first day of the month immediately after receipt and at all Sites. The fee will be calculated on the "shrunk" tonnes (refer to the Storage and Handling Agreement for further information on "Shrink"). The fee will continue to be charged to the customer on the opening balance of the Accounting Stock tonnes on the 1st of every month until unloaded from GrainCorp storage.

3.1 Services included in the Storage Fee

The services provided in the storage fees are as follows:

- Maintenance and provision (including electronically) of grain stock records by site and grade;
- Pesticide and fumigation application as required during the storage period;
- Condition monitoring, including aeration and temperature monitoring of canola;
- Provision of web based information regarding grain accessibility.

Additional services for aerating storages and temperature monitoring are available and may be subject to additional fees.

4.0 Country Outloading Fees

4.1 Country Outloading to Domestic or Export

Country Outloading Fee to either domestic or export	Destination	Fee / T
Road and rail Monday to Friday (public holidays excluded) during daylight business hours at primary and major sites	Domestic & Export	\$5.42
Road and rail for extended hours (by arrangement and subject to availability of labour) at all sites	Domestic, export and all other destinations. Excludes container packers	\$7.03
All other outloading requirements not specified		POA

Extended hours of outloading to rail (eg. 24 hour loading plus weekends and public holidays) are available upon request but subject to labour availability.

4.2 Country Outloading to Container

Country outloading to containers includes:

1. Outloading to GrainCorp Packing sites (Brisbane, Sunshine and Geelong)
2. Outloading to non GrainCorp packing sites
3. Outloading to containers to be packed at an accredited GrainCorp site by GrainCorp
4. Outloading to containers to be packed by an approved mobile packer on an accredited GrainCorp site
5. Prices in table below do NOT include container packing fees

When outloading to containers, GrainCorp will meet the minimum standard grade receival specifications.

Country Outloading Fee for Containerisation	Destination	Fee / T
<ul style="list-style-type: none"> ▪ Road and rail Monday to Friday (public holidays excluded) during daylight business hours at primary and major sites ▪ Loading of road vehicles or wagons ▪ Does not include container packing fees 	GrainCorp packing site as above, or non GrainCorp packing site	\$5.42
<ul style="list-style-type: none"> ▪ Road and rail Monday to Friday (public holidays excluded) during daylight business hours at primary and major sites ▪ Packed by GrainCorp or ▪ Packed by a GrainCorp approved mobile packer ▪ Does not include container packing fees 	An AQIS accredited country GrainCorp site	\$7.42
<ul style="list-style-type: none"> ▪ Road and rail for extended hours (by arrangement and subject to availability of labour) at all sites ▪ Loading of road vehicles or wagons ▪ Does not include container packing fees 	GrainCorp packing site as above, or non GrainCorp packing site	\$7.03
<ul style="list-style-type: none"> ▪ Road and rail for extended hours (by arrangement and subject to availability of labour) at all sites ▪ Packed by GrainCorp or ▪ Packed by a GrainCorp approved mobile packer ▪ Does not include container packing fees 	An AQIS accredited country GrainCorp site	\$9.03

Extended hours of outloading to rail (eg. 24 hour loading plus weekends and public holidays) are available upon request but subject to labour availability.

4.3 Services included in the Outloading Fee

Services included in the outloading fee are as follows:

1. Loading of rail wagons (at sites on rail) during normal hours of operation, as advised by GrainCorp from time to time;
2. Loading of road vehicles, at sites where road outloading is available, during normal hours of operation, as advised by GrainCorp from time to time.
3. The outloading fee is calculated on the outloading tonnage. The rail and road outloading fee will be payable on the following activities:
 - a. Rail outloading fee is payable on grain out-loaded to the customer or to GrainCorp Packing Facilities or Port Terminal by rail transport from the country site.
 - b. Road outloading fee is payable on grain outloaded to the customer or the ContainerLink or Port Terminal by road transport from a country site.
 - c. Where grain is moved from one country site to another by road transport the difference between the road and rail outloading fee (where there is a differential) is payable on the tonnage outloaded to the other country site and the rail outloading fee is payable on grain outloaded to the customer or to GrainCorp Packing Facilities or Port Terminal by rail transport from the other country site.
 - d. Where grain is moved from one country site to another for the purposes of consolidation or elevation to rail, only the final journey to GrainCorp Packing Facilities or Port Terminal or domestic end-user will be charged where no differential exists between the outloading rate of the originating country site and the destination Country Site however transshipment fees may apply (refer to Transshipment Schedule for Tariff Rates or contact your GrainCorp Business Manager for a quote)

4.4 Order Notification Requirements

Minimum notification periods are required for road outloading. Failure to meet these order requirements may lead to outload delays. Orders may not be processed if received after the cut-off times outlined below.

- At primary sites, all outloading requests must be received prior to 3pm on the business day before the outload date requested. No minimum order tonnage limitations are applicable however outloading request is subject to the grade being shown as available on the *Grain Availability Sheet* of the current week.
- At non-primary silos, all outloading requests must be received prior to 3pm two business days prior to the outload date requested. No minimum order tonnage limitations are applicable however outloading request is subject to the grade being shown as available on the *Grain Availability Sheet* of the current week. Where the grade is shown as 'by arrangement', outloading will be subject to labour availability.
- It is the customer's responsibility to ensure that road transport providers advise GrainCorp of vehicle registration details by 5pm the day prior to outloading unless using the GrainCorp web truck booking program where registration bookings can be made up to 6:00am on the day of outloading. An estimated time of arrival is required for each truck registration.
- For additional security purposes, GrainCorp requires the customer to provide destination details for all road outturns to the domestic market.
- It is a requirement for road transport operators to maintain direct contact with the outload site on the day prior and the actual day of outload for final confirmation of arrival time. A road carrier must be able to quote the appropriate GSO number and destination to the site operator upon arrival for grain security reasons. Failure to contact the site may lead to delays, as cancellation staff may not be available. A contact list for sites is available on the GrainCorp web page.
- The list of Primary Sites and Major sites (subject to change) is attached as Appendix 1

5.0 Miscellaneous Charges

5.1 Pesticide Residue Free Grain

Pesticide Residue Free (PRF) grain is grain that has not been treated by GrainCorp with a contact pesticide. GrainCorp is not responsible for PRF grain that has been accepted into the GrainCorp storage and handling system from other bulk handling companies, private storage or from growers as GrainCorp does not test on receipt for the presence of prior treatments. Nor is GrainCorp responsible for prior treatments or contamination from storage, handling or transport equipment. PRF grain is supplied to the market via common grain paths, elevators, conveyors, silos, road/rail trucks etc which have the capacity to transfer low levels of contamination of pesticides. Please refer to the relevant clauses in GrainCorp's Storage and Handling Agreement.

Pesticide Residue Free Grain	Fee / T
Payable on all grain shipped as PRF	\$1.10

This is applicable where grain is requested by the customer, **and agreed by GrainCorp**, to be shipped in bulk or containerised as pesticide residue free to either the domestic or export market. Payable on all grain required to be shipped as PRF.

- PRF grain requests require a minimum of four weeks notice
- GrainCorp does not guarantee PRF grain nor accept any liability for grain not meeting PRF requirements
- GrainCorp can only review the hygiene history for grain held in GrainCorp storages
- PRF requests must be stated clearly on all enquiries, packing instructions and VNAs
- The fee covers site selection and arrangement of samples and arrangement of tests
- PRF testing for bulk shipments is included in the fee above
- PRF testing for bulk shipments does not include rapid tests and is at the shipper's expense
- PRF testing for containers is at the shipper's expense
- PRF results are usually only available after the vessel has sailed
- If the grain is found to exceed maximum residue levels at the destination, GrainCorp will refund the fee of \$1.10 per tonne but accepts no liability

5.2 Pesticide Residue Restricted Grain

Pesticide Residue Restricted (PRR) grain is grain that is selected, tested and outturned to a pesticide level which varies from the maximum residue limits prescribed for the commodity by the Australian Pesticides and Veterinary Medicines Authority (APVMA) and Food Standards Australian & New Zealand (FSANZ). GrainCorp is not responsible for ensuring pesticide restricted grain meets specified residue tolerances where the commodity has been accepted into the GrainCorp storage and handling system from other bulk handling companies, private storage or from growers as GrainCorp cannot have knowledge of nor be responsible for prior treatments or contamination from storage, handling or transport equipment. Pesticide restricted grain is supplied to the market via common grain paths, elevators, conveyors, silos, road/rail trucks etc which have the capacity to transfer low levels of contamination of pesticides. Please refer to the relevant clauses in GrainCorp's Storage and Handling Agreement.

Pesticide Residue Restricted Grain	Fee / T
Payable on all grain shipped as pesticide residue restricted grain	\$1.10

This is applicable where grain is requested by the customer, **and agreed by GrainCorp**, to be shipped in bulk or containerised as pesticide residue restricted grain to either the domestic or export market. Payable on all grain required to be shipped as PRF.

- PRR grain requests require a minimum of four weeks notice
- GrainCorp does not guarantee PRR grain or accept any liability for grain not meeting PRR requirements
- GrainCorp can only review a the hygiene history for grain held in GrainCorp storages
- PRR requests must be stated clearly on all enquiries, packing instructions and VNAs
- The fee covers site selection and arrangement of samples and arrangement of tests
- PRR testing for bulk shipments is included in the fee above
- PRR testing for bulk shipments does not include rapid tests and is at the shipper's expense
- PRR testing for containers is at the shipper's expense
- PRR results are normally only available after the vessel has sailed
- If the grain is found to exceed maximum residue levels at the destination, GrainCorp will refund the fee of \$1.10 per tonne but accepts no liability

5.3 Branchline Throughput Fee

Country Rail Throughput Fee	Fee / T
	\$POA

Details to be advised

5.4 Re-Delivery Fee

Re-Delivery Fee	Fee / T
Grain outloaded from GrainCorp country site and returned to GrainCorp country site.	\$6.60

This fee is applicable to grain outloaded from GrainCorp's sites and rejected at its destination for reasons outside of the control of GrainCorp and tendered for re-delivery to GrainCorp storage. This fee applies to all sites and will be applied at the discretion of GrainCorp. This fee will apply if grain is rejected at a destination for quality non conformance and subsequent load samples indicate that the load is within specification.

5.5 Other Miscellaneous Fees

Other Miscellaneous Fees			
Buyer to Buyer Transfer (sellers fee)	Internet	Per tonne	\$0.17
	Manual	Per tonne	\$0.32
Customer requested receipt Amendment*	Internet	Per receipt	Nil
	Manual	Per receipt	\$33.00
Shipping & domestic outturn quality certificate		Per certificate	\$27.50
Inter-Zone transfer fee (QLD only)		Per tonne	\$2.64
Cash price withdrawal	Fax/email	Per site	\$5.20

* Where amendment relates to registration, contract number or subsidiary of Customer

^ Cash price withdrawal fee is a fee per site for the requested withdrawal of the customer's cash price on any normal working day. Multiple prices and grades per site are included in the fee. The service is not available on weekends or public holidays
