GrainCorp 09/10 Wheat and Barley Loan Interest Rates -UPDATE -

The 09/10 Harvest Wheat and Barley Pools managed by GrainCorp provide growers with six different payment options. These payment options are offered to give growers as much flexibility as possible to manage their individual cash flow situation.

The Standard and Flexible loan payment options are repaid via the pool distribution payments and interest is charged at a competitive and variable interest rate.

Following the announcement from the Reserve Bank of Australia on December 1st 2009, that the cash target rate has been increased by 0.25%, our rates have been increased with the same amount.

The new interest rates charged for these two payment types as per December 22nd 2009, are outlined as per below:

Standard Loan interest rate = 6.75%
Flexible Loan interest rate = 7.35%

GrainCorp does not make any additional profit from financing the pooled grain and the above rates reflect the interest rates charged by the bank financing the Wheat and Barley pools.

The above variable rate may continue to change during the year in tandem with general interest rate changes. GrainCorp will publicly announce any rate changes during the year and ensure the prevailing rate is available on www.graincorp.com.au.

If you have any further questions regarding the above interest rates or any of the pool products please contact your local Grain Marketing Services manager on the below direct numbers. Alternatively call GrainCorp on 1800 809 482.
